STATE OF MARYLAND,
DEPARTMENT OF PUBLIC EDUCATION.

Office of the State Board of Education,

Baltimore, January 14, 1880.

To His Excellency WM. T. HAMILTON,

Governor of Maryland:

SIR:—I have the honor to lay before you the Report of the State Board of Education for the school year ending July 31, and the fiscal year ending September 30, 1879, with accompanying documents, as required by law.

I have the honor to be,

Your obedient servant,

M. A. NEWELL,

Secretary.

REPORT OF THE STATE BOARD OF EDUCATION.

The following summary, in connection with the accompanying tables, exhibits, in a condensed form, the most important facts connected with the administration of the Public School System of the State, including the city of Baltimore, for the year ending September 30, 1879, so far as such facts can be presented in figures:

Number of schools in Baltimore city.....	125	
“ “ in the counties.....	1,884	
Total		2,009
Being an increase in 1879 of.....	20	
Number of different pupils, city.....	53,392	
“ “ “ counties.....	112,094	
Total		165,486
Being an increase in 1879 of.....	9,212	
Highest number enrolled in one term, city.....	36,505	
“ “ “ “ counties.....	93,386	
Total		129,891
Being an increase in 1879 of.....	2,436	
Average number in daily attendance, city.....	30,477	
“ “ “ “ counties.....	53,768	
Total		84,245
Being an increase in 1879 of	2,416	
Number of teachers, city	822	
“ “ counties.....	2,269	
Total		3,091
Being an increase in 1879 of.....	20	
Number of months schools were open, city.....	10	
“ “ “ “ counties.....	8 5-6	
Average for the State.....		9 5-12

Amount paid for teachers' salaries, city.....	\$500,947 15
“ “ “ “ counties	638,473 89
Total	\$1,139,421 04
Being an increase in 1879 of.....	\$17,007.35
Amount paid for building, repairing and furnishing school-houses, city.....	\$64,586 52
Amount paid for building, repairing and furnishing school houses, counties.	107,372 78
Total	\$171,959 30
Being a decrease in 1879 of.....	\$35,703.80
Amount paid for books and stationery, city.....	\$30,476 53
“ “ “ “ counties	53,580 16
Total	\$84,056 69
Being a decrease in 1879 of.....	\$10,896.32
Amount paid for rent, fuel and incidentals, city....	\$47,884 99
“ “ “ “ “ counties.	44,877 70
Total	\$92,762 69
Being an increase in 1879 of.....	\$4,059.80
Total expenditure for Public School purposes, city..	\$643,895 19
“ “ “ “ “ counties.	907,661 13
Total.....	\$1,551,556 32
Total expenditure for Public School purposes, 1878.	1,593 259 66
Being a decrease in 1879 of.....	\$41,703 34

Of the total expenditure by the city, (\$643,895.19)—

The current expenses of white schools amounted to.....	\$540,465 02
“ “ colored “ “	59,532 95
The expenditure for building and repairs for white schools.....	\$43,326 87
“ “ “ colored “	570 35

Comparing the County Schools of the present with those of the preceding year, we have—

Average number of schools reported in 1879.....	1,884
“ “ “ “ 1878.....	1,862
Increase in 1879	22
Total number of scholars enrolled in 1879.....	112,094
“ “ “ “ 1878	110,323
Increase in 1879.....	1,771

Highest number enrolled in one term in 1879.....	93,286	
“ “ “ “ 1878.....	92,167	
Increase in 1879.....		1,219
Average number enrolled in 1879.....	84,421	
“ “ “ “ 1878.....	82,260	
Increase in 1879..		2,161
Average number of scholars in daily attendance 1879.	53,768	
“ “ “ “ 1878.	52,311	
Increase in 1879.....		1,457
	1879.	1878.
Number of teachers (including assistants), men.....	1,216	1,207
“ “ “ “ women...	1,053	1,044
Total.....	2,269	2,251
Increase in 1879.....	18	
Average number of months schools were open, 1879.	8 months, 25 days.	
“ “ “ “ “ 1878.	8 “ 14 “	
Increase in 1879.....		11 days.
Amount received from State as School Tax, Free School Fund and Academic Fund, 1879.....	\$22,371 15	
Amount received from State as School Tax, Free School Fund and Academic Fund, 1878.....	361,738 56	
Decrease in 1879.....		\$39,367 31
Amount rec'd from appropriation to colored schools in 1879.....	\$79,441 56	
Amount rec'd from appropriation to colored schools in 1878.....	79,441 55	
Increase in 1879.....		\$ 01
Amount received from county taxation, 1879..	\$384,489 09	
“ “ “ “ 1878.....	385,651 56	
Decrease in 1879.....		\$1,162 47
Amount paid for teachers' salaries, 1879.....	\$638,473 89	
“ “ “ “ 1878.....	631,309 89	
Increase in 1879		\$7,164 00
Amount paid for building, repairing and furnishing school-houses in 1879.....	\$107,372 78	
Amount paid for building, repairing and furnishing school-houses in 1878.....	105,588 31	
Increase in 1879.....		\$1,784 47

Amount paid for books and stationery, 1879.....	\$53,580 16	
“ “ “ “ 1878.....	55,867 34	
Decrease in 1879.....		<u>\$2,287 18</u>
Amount paid for supervision and office expenses, 1879.....	\$37,900 82	
Amount paid for supervision and office expenses, 1878.....	40,582 78	
Decrease in 1879.....		<u>\$2,681 96</u>
Amount paid for incidental expenses, 1879.....	\$44,877 70	
“ “ “ “ 1878.....	42,990 13	
Increase in 1879..		<u>\$1,887 57</u>
Amount paid for interest in 1879.....	\$3,922 50	
“ “ “ “ 1878.....	4,115 02	
Decrease in 1879..		<u>\$192 52</u>
Amount paid for miscellaneous expenses, 1879.....	\$7,230 24	
“ “ “ “ 1878.....	6,404 40	
Increase in 1879..		<u>\$825 84</u>
Amount of indebtedness paid in 1879.....	\$14,303 04	
“ “ “ “ 1878.....	23,425 77	
Decrease in 1879.....		<u>\$14,122 73</u>
Total expenditures for Public School purposes, 1879.	\$907,661 13	
“ “ “ “ “ 1878.	915,283 64	
Decrease in 1879.....		<u>\$7,622 51</u>

The items of expenditure which show an increase are:

Salaries	\$7,164 00	
Building	1,784 47	
Incidentals	1,887 57	
Miscellaneous	825 84	
Total increase.....		<u>\$11,661 88</u>

The items of expenditure which show a decrease are:

Books and stationery, ...	\$2,287 18	
Supervision	2,681 96	
Interest.....	192 52	
Indebtedness.	14,122 73	
Total decrease.....		<u>\$19,284 39</u>
Showing a net decrease in 1879, of.....		<u>\$7,622 51</u>

Table "A" shows the population of Maryland by counties; the number of white and colored, and the number between 5 and 20 years of age.

Table "B" shows the quarterly distribution of the State School Tax to the several counties and the city of Baltimore.

Table "C" shows the amounts received by the several counties as "State School Tax," "Free School Fund," "Academic Fund," "Appropriation to Colored Schools" and "County Tax."

Table "D" shows receipts from all sources, with the totals, (including balances carried over).

Table "E" shows the expenditures of the several counties under the items, Teachers' Salaries, Incidental Expenses, Books and Stationery, Repairs and Furniture, Supervision and Office Expenses, Miscellaneous, Interest, Indebtedness Paid; with the balances on hand and the totals.

Table "F" shows the average number of scholars studying the different branches in the several counties.

Table "G" shows the number of schools in each county; the number of months schools were open; the number of teachers, male and female; the number of different pupils; the average number of pupils enrolled and in attendance, and the highest number enrolled in one term.

Table "H" shows the number of months the white schools were open; the total cost; the average cost of each pupil per month and per year, the amount paid for teachers' salaries, and the average amount paid each teacher per month and per year.

Table "I" shows the number of colored schools in each county; the number of teachers; with the total enrollment and average attendance of pupils.

Table "K" shows the number of months the colored schools were open; the total cost; the average cost of each pupil per month and per year; the amount paid for

teachers' salaries, and the average amount paid each teacher per month and per year.

Table "L" gives the statistics of the several colleges receiving State donations, and of the State Normal School.

Table "M" gives the statistics of the several schools and academies receiving State donations.

Table "N" gives a list of the County Examiners; their salaries, and the number of official visits paid to the schools.

The Annual Reports of the several Boards of County School Commissioners, which are given in full, deserve the special attention of tax-paying citizens. In them will be found a detailed and circumstantial account of the expenditures for each separate school, as well as the general expenses of the School Board. These reports show also, as well as such a matter can be shown by figures, the value received in return for these outlays; that is to say, the number of children taught in each school, and the branches of learning in which they were instructed. A careful study and analysis of such reports will form a necessary preparation for future legislation on the public school question.

The views of the Board respecting the propriety of asking for any change in the school law at the present time, are well expressed in the following extracts from a report made by a committee appointed to investigate the subject, and adopted unanimously by the Association of Public School Commissioners at their meeting in Baltimore, November 26, 1879—eighteen out of the twenty-three counties being represented on the occasion :

"So far as your committee have been able to ascertain the opinion of their fellow-citizens, the school law, as it stands, fairly represents the sentiments of the people of Maryland. While peculiarly adapted to our own wants, it comprises many of the best features of the best systems of other States, and is becoming every year better understood abroad and more popular at home. The animated

canvass preceding the late election gave a fair opportunity for a full expression of opinion on the subject. No opinion adverse to the system was expressed by any party. On the contrary, all parties endorsed the general principle; while a large majority approved the details of the law and the mode of administration.

"There are only two points on which any unfavorable criticism has been made—first, the method of appointing school commissioners; second, the expense of the system. It has been claimed that the appointment of school commissioners by the Judges of the Circuit Courts is *unconstitutional*. The only meaning that can be attached to this word in the present connection is, that the Constitution does not require the Judges to perform the duty; and if they should neglect it, there is no way to compel them to perform it. But as all the Judges, with a single exception, have performed this extra duty, and done it satisfactorily, there seems to be no reason to make a change. This method of appointment has worked well. It is not certain that any other would work better.

"Second. With regard to the expense of the system, your committee would remark, that while the aggregate is large, it is small compared with the work that has to be done. The total annual expenditure for the county schools, including not only teachers' salaries, but buildings, repairs, supervision, and every other expense connected with the administration, may be stated in round numbers at \$900,000. For this sum the law requires us to provide school facilities for over 200,000 pupils. It is evident that if all who have a legal right to admission were to avail themselves of the privilege, the funds would be entirely inadequate. The last school report shows that more than 110,000 pupils were educated in the public schools during the year. This proves the cost of education to have been but little more than \$8 per capita. If we reckon an average school with one teacher to consist of thirty enrolled pupils, then the average cost of such a school for teacher's salary, repairs of house, fuel, furniture and supervision, with a proportionate allowance for

new buildings, was only \$240. It is not possible, under present social conditions, to reduce this amount without destroying the efficiency and risking the existence of the schools. It is very doubtful whether the expenditure has not been already reduced below the point that true economy would indicate. We may be able to hold our own; but the loss of \$100,000 annually by the white schools, under the provisions of chapter 91 of 1878, will paralyze our power for future progress, unless the voluntary contributions of the people in the several counties shall make up the deficiency."

The effect of chapter 91, Laws of 1878, has been to lessen the legal income of the white schools \$100,000 a year. The actual income has not suffered so great a diminution, owing to the fact that the amount expected by the School Boards was not paid in full for several years previous to 1878. Still, the loss has been sensibly felt. It has retarded the building of school-houses and postponed necessary repairs; it has prevented the schools in some counties from being kept open four terms in the year, as required by law; it has reduced teachers' salaries in some counties and increased local taxation in others. Progress under the circumstances is difficult; and it is very doubtful if the present advanced position can be long maintained. There is no man in Maryland at all conversant with the subject, who does not know that the State tax of ten cents on the hundred dollars was intended for the support of white schools exclusively. In fact, when the tax was first imposed, the colored schools received no part of it whatever, and had no legal right to any part. They were entitled merely to "the total amount of taxes paid for school purposes by the colored people." Laws of 1868, chapter 407—IX.

It was well known to every member of the Legislature of 1872, that the \$50,000 then appropriated to the colored schools was to be taken from the general treasury, and not from the proceeds of the public school tax, which, up to that time, had been devoted exclusively to white schools. The words of the school law plainly indicate

that there were two sources of supply—the ten cent tax for the white, and a special appropriation—\$50,000 in 1872—for the colored schools. Section 3, sub-chapter XVIII of chapter 377, Laws of 1872, reads thus: “The Comptroller shall apportion *the sum appropriated for the support of the colored schools* of the several counties and the city of Baltimore in proportion to their respective colored population between the ages of five and twenty years; said apportionment to be made at the time he apportions *the levy for the white schools.*” The “levy for the white schools” is thus seen to be distinct from the “sum appropriated” to colored schools. But the language of the appropriation bill is still more convincing. Laws of 1872, chapter 252, title Schools: “To the several counties of this State and Baltimore city, to be apportioned as the Legislature may direct, \$525,000 or whatever sum may be paid into the Treasury on account of the levy of public school tax; * * * * * to the several counties and Baltimore city for the education of the colored children, \$50,000; for donations to colleges, academies and schools, \$31,500, as per Acts and resolutions heretofore passed. To the Deaf and Dumb Asylum at Frederick, \$25,000; to the Maryland Institute for the promotion of the Mechanic Arts, \$3,000; to the Colored Normal School, \$2,000, and for the Maryland Agricultural College the sum of \$6,000.” How can it be imagined that any one of these items can be paid out of another? Are they not all equally independent? If the \$50,000 for the colored schools was to be taken from the \$525,000 of public school tax, should not the other items of the paragraph be also paid from the same source? It is most earnestly to be hoped that the General Assembly of 1880 will reconsider this subject, and return to the law as it was understood and executed from 1865 to 1878. Then we may expect that all our schools, white and colored, will be able not only to maintain their present efficiency, but to make further progress.

The two most important items in the administration of a public school system are—first, the honest and judicious expenditure of public money; and secondly, the employment of efficient teachers.

The money is received by the Treasurer of the School Board, who is under a sufficient bond for the faithful performance of his duties, and it is expended by him under the orders of the Board. The largest items of expenditure (probably three-fourths of the whole amount) are for teachers' salaries and incidentals. These are reported by the teachers respectively, under oath; audited and approved by the local trustees; re-audited and re-approved by the County School Board; and finally passed to the Treasurer for settlement, whose bond is responsible if he makes an illegal payment, even after being ordered to do so by the Board, as was made plain by a case decided some years ago in St. Mary's county. The remaining payments, in addition to the fixed salary of the Examiner and the per diem of the School Commissioners, are principally for books, for fuel, and for building and repairs of houses. These items are kept separate, and where it is possible, they are charged against each school separately. Thus a citizen of any county can ascertain, by looking at the annual report, how much any school in which he is interested receives on account of salary, repairs, incidentals, &c. If any false representation is made, the real facts can easily be ascertained.

In the purchase of books and the building of houses it would be too much to claim that no mistakes are ever made. It is sufficient to say that there has been no evidence of either extravagance or dishonesty. It is a great pleasure to be able to put on record that during the fifteen years that have elapsed since the beginning of the system, nearly \$12,000,000 have passed through the hands of forty different Treasurers, not only without the loss of a single dollar, but without one plausible charge of serious indiscretion.

As to the selection of teachers: It is difficult to see how the public could be better guarded against the misfortune of having incompetent teachers placed in office than under the present system. First, no teacher can be selected by the Trustees unless he has a certificate of qualifications from a legal Examiner. Secondly, this

selection is not valid until it is confirmed by the County School Board. But thirdly, if he is a "new man," his certificate expires at the end of six months, and cannot be renewed unless the Examiner is satisfied, after careful personal examination, that the "licentiate" has proved to be a competent teacher. (Graduates of the State Normal School are required to spend a year in probation before receiving their permanent diploma). Nor is this all: for fourthly, if a teacher, after all these precautions, should prove incompetent, the Trustees can dismiss him on thirty days' notice; and finally, should the Trustees be unwilling to assume this responsibility, the State Board of Education has power to remove the teacher when the facts are properly presented.

The next most important item is the building of school-houses. The law requires school-houses to be built according to plans approved by the Board of County School Commissioners. It sometimes happens that mistakes are made through the inexperience of these gentlemen; and it would be well to have some uniform plans for their guidance. In this connection the State Board endorses the report adopted by the Association of Public School Commissioners: "In planning a school-house, the first thing to be considered is the number of pupils to be accommodated. It may be assumed that the minimum number is 30. The next point is the number of square feet of floor-space and the number of cubic feet of air-space to be allowed to each pupil. Authorities differ on this point; but no good authority gives less, under any circumstance, than 15 square feet of floor-space by 12 feet of height, or 180 cubic feet of air-space. The best authorities consider double this amount to be desirable, though not practicable. Taking the lowest estimate, the school-room for 30 pupils must have 450 square feet of floor-space and 5,400 cubic feet of air-space. This will be supplied by a house 18 by 25 feet and 12 feet high in the clear. Such a house will contain three rows of double desks, five in each row, with four aisles 18 to 22 inches wide, according to the size of the desks, and a space of 10

feet by 18 for teacher's platform and recitation benches. By diminishing this latter space a little, thirty single desks may be placed in the room. The width of the house must be proportioned to the number of rows of desks which it is proposed to place in it. Assuming the double desks to be used, (as is the case in nearly all our schools), a house should be built to hold three rows in its width, or four rows. It is not convenient to have less than three nor more than four. Consequently, a house or room should be either 18 feet wide or 23.6. These then, are our standards of width for double desks. If a house is to be built for 40 pupils, we may either increase the minimum length or width. By adding 5 feet 4 inches to the minimum length, we have a house 18 feet by 30 feet 4 inches, which will accommodate 42 pupils. For 60 pupils, the house should be 23.6 in width (four rows of desks) by 36 feet long.

"The next point to be considered is the heating and ventilation. Here two rules may be laid down: First—Every school-house should have one or more brick flues, open from the floor to the roof. Second—Every stove should have a pipe to bring in fresh air for its own consumption. The plan formerly so prevalent of running a stove-pipe through the middle of the roof is mentioned only to be condemned. It is unsafe. More houses have been burned through this faulty construction than from all other causes combined; and it makes ventilation impossible. A brick flue is not expensive; it is safe; and by dividing it longitudinally into two sections, it is converted into a ventilating shaft. Even a single flue may be used for the double purpose of carrying off the smoke and discharging the foul air, by entering the stove-pipe near the ceiling, and leaving a hole in the flue near the floor for the exit of cold air. This hole may be fitted with a register, which can be closed, if necessary occasionally, to prevent a down draft.

"So much may be said briefly with regard to building a school-house with one room. If more than one room is needed, the following considerations may be found use-

ful. A country school-house ought generally to have but one story. The small saving in original expense made by building a two-story house is counterbalanced by the continued expense of keeping the stairway in repair and by a great loss of convenience. When the number of scholars does not much exceed sixty, the main room should have desks for all the pupils; and a recitation room, with benches only, should be added. This room should be used for small classes, and should have not less than 300 square feet of floor-space."

The State Board has held during the year the four regular meetings required by law. Several cases of some importance have been adjudicated, and the parties concerned have thus been saved the delay, annoyance and expense of legal processes. The language of the School Law regarding High Schools is very indefinite; and a case having arisen on which a Board of County School Commissioners asked the official judgment of the State Board, the following minutes were entered on the Journal:

"1st. Any public school where branches of learning are taught in addition to those which are required by the School Law to be taught without charge, may, in the discretion of the County School Board, and within the limits prescribed by the School Law, be constituted and declared a High School or High School Department.

"2nd. In a High School or High School Department thus established, the County School Board may, at their discretion, charge a reasonable fee for tuition.

"3rd. In case such fee is not paid, the County School Board may refuse admission to the pupil, or may dismiss such pupil if already admitted."

Sections 11, 13 and 14 of article V, and section 2 of article VII of the By-Laws have been amended to read as follows:

Article V, section 11. Teachers shall purchase, when necessary, such articles as are allowed by section 5, article VII, and may pay for them out of money received for books and stationery, and present receipted bills for the

same, placing the amounts under the proper heads in their term reports.

Sec. 13. *Form of Contract.*—The undersigned, Trustees of Public School No. —, Election District No. —, County of ———, do hereby appoint ——— as Teacher of said School, subject to confirmation by the County School Board, and at such salary as said Board may direct, to take effect on — day of ———, 18—. This appointment to continue from term to term and from year to year, until revoked according to law, (to wit: by thirty days' notice in writing, signed by at least two Trustees); of which revocation due notice must be given to the County School Board.

Sec. 14. If a teacher wishes to vacate his school, thirty days' notice in writing previous to the end of the term must be given to the Trustees and also to the County School Board. If any teacher leaves without giving notice, he shall be disqualified to serve again, except by consent of the School Board.

Article VII, sec. 2. The school year of ten months shall be divided into four terms as nearly equal as possible, to be called the Fall, Winter, Spring and Summer terms, respectively.

The most important of these amendments is that of section 13 of Article. It is intended to make the tenure of office of a teacher as long and as secure as is possible under the law providing for his possible dismissal on thirty days' notice.

REPORT

OF THE

Principal of the State Normal School.

The Principal of the State Normal School is *ex-officio* Superintendent of Public Instruction. When the State school system began in 1865, the Superintendent of Public Instruction was *ex-officio* Principal of the State Normal School. The school law of 1868 reversed the relations; but it did more: it united both offices in one officer.

It would seem hardly to admit of doubt that the time has come when the offices should be separated, and a State Superintendent appointed who could give his whole time and energies to his special work. The only objection that is likely to be made is on the ground of expense; but the importance of the trust should be a sufficient answer to this. There is another and more serious objection: that the office is apt to become a political one, and that appointments will be made to promote partisan rather than educational interests. There is no way of avoiding this danger altogether; but it may be lessened by proper legislation. The practice of rotation in office, unwise as it is when applied to clerical duties, becomes absurd when applied to education. An annual or even a biennial change in the administration of a department which is still in its formative stage would be fatal to healthy growth. But if sufficient permanence could be secured, and the office removed from the class of political rewards, the appointment of a superintendent of ability and experience would contribute greatly to the present efficiency of the school system, and ensure its improvement in the future.

The period covered by this report has been one of great financial depression; and the schools have not entirely escaped the depressing influence of the times. But the

effect has thus far been only to diminish the rate of progress. Had times been better and money more plentiful, the advance would have been greater; but it is matter of congratulation that, under the circumstances, there should have been any improvement at all. With a small decrease in the total expenditures, there has been a small increase both in the total enrolment and the average attendance of pupils, and a slight increase (about one per cent.) in the expenditures for teachers' salaries.

The improvement in the internal management of the schools has been well marked. After visiting schools of all grades in eleven counties, I am able to bear personal testimony to their general efficiency. Much however, remains to be done in order to bring the backward schools up to the level of the best; and this can be accomplished only by the persistent efforts of the County Examiners, aided by the hearty co-operation of the trustees and school commissioners.

In the desire for retrenchment which has pervaded all sections and all parties in the State, it was not to be expected that the schools should be unnoticed; yet the only practical suggestion that I heard in this direction was that \$20,000 a year might be saved by abolishing the office of County Examiner. This would be about as wise economy as if a mill owner employing a large number of "hands," were to dismiss his manager in order to save the amount of his salary. The services of the Examiner are simply indispensable; and his ability and fidelity can be accurately measured by the efficiency of the schools which he controls. There is no small economy that would produce such speedy and disastrous results as the lack of a competent administrative officer.

It affords me pleasure to bear witness to the general efficiency and fidelity of the County Examiners. There have been differences in the results obtained by them, but on the whole they have added largely to the productive power of the money expended for public education. The length of time that many of them have been retained in office under many changes of administration, proves

the high estimation in which they have been held by their fellow-citizens. The Examiner of Queen Anne's county has held his place for fifteen years—that is to say, from the beginning of the State school system in 1865. The Examiners in Caroline, Carroll, Cecil, Dorchester, Montgomery, Talbot and Washington counties have been retained for twelve years—from the reorganization of the system under the Constitution of 1867 to the present time. In Baltimore county and Prince George's there have been no changes in the same time, except those caused by death. In Charles and Frederick the Examiners were changed but once in twelve years; and in the remaining counties the average time of service has been four years. At this writing, (January 14, 1880), it is understood that twenty-one of the twenty-three Examiners have been reappointed for a new term of two years.

I have visited and carefully examined the most of the High Schools and some of the largest graded schools in the State during the year. The result was in most cases highly satisfactory. There are symptoms of a reviving taste for classical learning which I trust will not disappoint our expectations. As the public schools have abolished private schools (except in cities) by making them unprofitable, it has become necessary for the former to assume some of the functions of the latter. The Primary Schools are the substitutes of the old county free schools, and the High Schools are the legitimate successors of the old academies. Both Primary and High Schools must be supported, encouraged and extended if we would keep our place in the march of civilization. The expense of the High School is the only plausible, and indeed, the only real argument against it. But it must be borne in mind that in a community that sends one hundred and fifty children to school, we can have a graded school with a High School department at about the same expense as will maintain five county schools having an average attendance of thirty pupils each. Indeed, if the people wish to have it done, and will take the proper means of doing it, algebra can be taught as

cheaply as arithmetic, and Latin grammar as cheaply as English grammar.

Teachers' Institutes or Associations have been held during the year in many, though not in all the counties. The reduction of salaries in some counties, and delay of payment in others, have made the school authorities reluctant to impose any additional burden on the teachers; but wherever these meetings were held the results have justified our highest expectations. The counties of Alleghany, Baltimore, Carroll, Cecil, Harford, Kent, Queen Anne, Talbot, Wicomico and Washington may be mentioned as specially active in this line.

The meeting of the State Teachers' Association at Hagerstown in August was well attended and excited great interest. The papers read and the discussions that followed were well calculated to disseminate sound views, both as to the theoretical principles and the practical details of the work of education.

The statistics of the colleges receiving aid from the State will be found in the proper table of this report.

As one of the Trustees of the Agricultural College, I have better facilities for obtaining exact information about its condition than can be gathered from written returns. The improvement in this institution mentioned in my last report has been maintained and increased. Under the cautious but energetic administration of the President, aided by the hearty co-operation of a corps of able and hard-working instructors, the college seems to have taken a new lease of life, and gives cheering evidence that it will yet fulfil the promise of its youth. The harmony in the Board of Trustees has been unbroken, and they have given the President the benefit of their unhesitating and undivided support. To make agriculture the special, but not the exclusive subject of instruction; to give every student a good general education; while those who desire it may devote a large portion of their time to the science and art of tilling the soil, is one of the main objects of the college. But it desires to do more: it aims to diffuse some scientific knowledge of

agriculture among the community; to add dignity to the calling of the farmer by allying science with industry; to send young men to their homes impressed with the conviction that they may be as useful, as honorable, and as happy in the cultivation of the soil as in the walks of commerce or in the practice of law or medicine.

The Visitors and Governors of WASHINGTON COLLEGE report "that during the last scholastic year there were thirty-three students in regular attendance upon the college classes, besides a lecture class of eight who received regular instruction from the college, thus making a total of forty-one students. The nine county scholars provided for by the Act of 1856, chapter 219, and the six provided for by the Act of 1874, chapter 282, were all filled by creditable students, who received tuition, board, books and stationery free of charge, and five indigent scholars in addition have received tuition free of charge. Since the commencement of the present term the county scholarships are all again filled, and there are indications of considerable increase in the number of students. The discipline and management of the institution continue to be eminently satisfactory to the Visitors; and the college is steadily growing in the public favor."

The WESTERN MARYLAND COLLEGE at Westminster is in a satisfactory condition. It is the only college in the State in which young men and young women are received on equal terms and afforded equal advantages. The President reports "that all the scholarships provided for by the State have been availed of, except the one for the Second Senatorial District of Baltimore city. The scholars have all given the required bond, and they have all made good progress in their studies, and bid fair to become useful teachers if they be spared to complete their course."

The MARYLAND INSTITUTE for the Promotion of the Mechanic Arts has stepped into line as one of the most valuable educational auxiliaries of the State. The importance of drawing as a branch of elementary education has long been acknowledged in theory; but there has

been much difficulty in reducing the theory to practice, on account of the lack of qualified teachers. This obstacle is now in a fair way of being removed. Classes for instruction in every department of drawing and painting have been opened at the Maryland Institute, and are attended by large numbers of young persons. Special attention is given to teachers, (of whom a number attend on Saturdays), and the course of instruction is so arranged as to prepare them to teach drawing to others thoroughly and successfully. Considering how much the State has to gain from the prosecution of industrial art, it is reasonable to expect that this enterprise will be encouraged as it deserves. The interesting and valuable report of the Honorable Carroll Spence, Chairman of the Committee of the School of Design, who visited Philadelphia, New York and Boston on a mission of inquiry into the progress and methods of art education in those cities, shows very clearly the vast importance of this subject to our material interests, and encourages the hope that as Baltimore has had, in point of time, the first, and in point of numbers, the largest Art School in the country, she is now about to have the best and the most useful.

The JOHNS HOPKINS UNIVERSITY is now in the course of its fourth year of instruction. There are at the present time thirty-two instructors of various grades, and one hundred and forty-five students. There are twenty fellowships open to students from any part of the country, and a larger number of scholarships, giving free tuition, open to young men from Maryland, Virginia, North Carolina and the District of Columbia. Of the present students, eighty-six are from Maryland; the remaining fifty-nine come from twenty-two States of the Union and from three foreign countries. Graduate, undergraduate and special students are received and instructed according to their various requirements. The degrees of Doctor of Philosophy and of Bachelor of Arts have been conferred upon a small number of students who have passed the requisite examinations. Equal care is bestowed upon the scientific and literary departments. Instruction is

given in Greek, Latin, French, German and English, as well as in the Oriental languages; in logic, philosophy, history and political science. The higher mathematics have been taught to students who are disposed to go far beyond the ordinary limits of a college course. In the chemical, physical and biological laboratories, ample arrangements have been made for instruction in chemistry, natural philosophy, zoology, botany and physiology. The scientific apparatus has cost nearly \$30,000; the library nearly \$25,000. More than 250 literary and scientific periodicals are taken in the reading room, which stands open to the students from 9 A. M. to 10 P. M. Courses of lectures by resident and non-resident professors have been open to the public during a considerable portion of every year. In the second year a teachers' class in physiology was instructed by Dr. Martin; in the third year a teachers' class in zoology was taught by Dr. Brooks—(both involving the constant use of the microscope); and during the present year teachers' classes in early English and mathematics have been promised. The Chesapeake Zoological Laboratory has been maintained for two successive summers, in order to study the marine life of the waters adjacent to Maryland. Four scientific periodicals are issued under the auspices of the university, respectively devoted to mathematics, chemistry, biology and philology. Every exertion is made by the authorities of the university to keep informed in respect to the progress of education in this and other countries, and to adapt the experience thus acquired to the needs of our own State at the present time. The President and professors desire to be in hearty co-operation with all the other educational agencies of the State.

The STATE NORMAL SCHOOL continues to perform satisfactorily the work for which it was established. Its graduates are much sought after as teachers, and they aid in diffusing the principles of the "new education" throughout the State. Many students who have not completed the course of instruction also find employment as teachers. Most of them give satisfaction to their em-

ployers, but the school should be held responsible for its graduates only. Since the organization of the school, in 1866, there have been 222 graduates (not reckoning a small number who received Primary diplomas in the early years), and of these 177 are now teaching; 16 (ladies) are married; 10 are dead; 4 (gentlemen) taught for several years and then went into other employments; and one (lady) gave up teaching on account of ill health. The remaining 14 are temporarily unemployed for various reasons.

The number of students (including graduates) who are known to have taught not less than two years after leaving the Normal School is 566. Their names are published in the Annual Catalogue of 1879.

In order to accommodate teachers whose schools close about the 15th of April, a short Summer session was held, beginning May 1st and ending June 15th. It was attended by twenty earnest and enthusiastic teachers, and the results were such as to encourage the faculty to continue the experiment.

It is a common complaint among half-educated people, and it is re-echoed by some theoretical educators, that our common schools teach too many things. In a certain sense this is true; but in a deeper sense it is the reverse of the truth. Our common schools might be raised to a higher level than they now occupy, and yet teach nothing but speaking, reading, writing and arithmetic. It is not necessary to teach spelling as a separate art. He who has been properly taught to read will be able to spell all that he has read, and more is useless. When we teach a person to read, we teach him the art of getting knowledge from a printed book. He has not learned to *read*—he may have learned the names of words—till he has acquired this art. But an art is acquired by practice. He must, therefore, practice the art of acquiring knowledge from a printed book. I do not mean the art of memorizing and reciting words, which is quite a different thing. Now on what subjects shall he practice this art? Can there be anything better adapted to the purpose, more useful, or more interesting than books containing infor-

mation about this world in which we live (geography); about the people who have lived in it (history); about our own bodies (physiology); about right and wrong (morals)? Such readings are not out of place in elementary schools; if children are to be taught to read at all, that is, to acquire knowledge out of printed books, they should be taught to read something worth acquiring and worth retaining. The art of reading, in this sense, cannot be attained without much practice on real subjects. Between ordinary school reading and real reading there is as much difference as there is between a dress parade and a hard fought battle. Again, every one acknowledges that children should be taught to speak correctly. But "speaking correctly" is another phrase for the art called "grammar," which, also, can only be acquired by practice. Writing is taught for the purpose of enabling us to express our thoughts on paper. If we stop short of this, we merely climb a staircase without entering the room. Writing so as to express thoughts is another art—composition—which, like the rest, can only be acquired by practice. Not to speak of arithmetic, about which, curiously enough, there is no dispute, we see that all, and more than our common schools teach, can be embraced in the traditional three "R's." How then can it be said, in any sense, that the schools teach too much? They (I am speaking of the least progressive among them) teach too much spelling, too much naming of words, too much memorizing of words, too many technical definitions in grammar, too many unrelated and unretained facts in geography and history, too many intricate, perplexing and comparatively useless processes in arithmetic. It would be better far to have the three "R's" taught in the way I have suggested by a zealous, intelligent, sympathetic teacher, who would bring his mind into contact with the minds of his pupils, and develop thereby the "living fire of thought," than a whole cyclopedia taught by a stupid book-worm or a rigid pedagogue of the lesson-hearing school. The instruction of our common schools should enable one who has attended them from

his sixth to his sixteenth year to understand what he reads; to form an independent judgment on questions which he understands; to express his thoughts correctly, both in speaking and writing, on subjects within range of his knowledge, and to refrain from expressing or forming an opinion on matters about which he has not sufficient information.

M. A. NEWELL,
Principal.

REPORTS
OF THE
SCHOOL COMMISSIONERS
OF THE
COUNTIES.

ALLEGANY COUNTY.

DR. GEO. B. FUNDENBERG, *Prest.*

J. W. S. COCHRANE, *Sec'y, &c.*

Professor M. A. Newell,

DEAR SIR: The condition of our schools for the past year has been satisfactory in many respects, and we are glad to report progress in all directions. In the summer of 1878 and again in the summer of 1879, we had a county Normal school in the city of Cumberland. The expense of the school for the first year was borne by the Board of School Commissioners, but the work accomplished was so gratifying that we found our teachers both willing to attend and to pay tuition, the second year. The result has been to bring about a uniformity in school work that we have never had before. This improvement is especially noticeable in the teaching of the first and second grades. Five new school houses have been built during the year. One of these is a large brick building, located in the city of Cumberland, capable of seating six hundred pupils, and for comfort and convenience is one of the best school houses in Maryland. The contract price was \$12,500.00, of which the sum of \$6,000.00 was paid prior to September 30, and \$4,000.00 in October of the present year, leaving a balance of \$2,500.00 still due. The four other houses—three of which are located in the mining region and one at Flintstone—were built to seat 125 pupils each, at an average cost of \$960.69. We are sorry to report that the County Commissioners gave the schools \$3,000.00 less for the ensuing year than last year, but glad to believe that their action in this respect was not approved by the people.

J. W. S. COCHRANE,

Secretary.

ANNE ARUNDEL COUNTY.

RICHARD H. GREEN, *President.*

WILLIAM HARWOOD, *Secretary.*

Prof. M. A. Newell,

Secretary, State Board of Education,

SIR: The Annual Report of the Board of County School Commissioners of Anne Arundel County is herewith submitted.

But for our financial embarrassments, we might say our schools are generally in a prosperous condition. The school-houses built or repaired, the numbers of school-houses, of teachers and pupils, and other statistical details are exhibited in the tables accompanying this report. It will be seen by these that there are now in Anne Arundel County, with the addition of one just established, twenty-five schools, with thirty teachers for the children of the colored population, in which two thousand and eighty-three children are carefully instructed under the supervision of the Commissioners and the Examiner. The teachers in these colored schools are promptly paid at the end of each term, as the funds for their support are regularly received from the State Treasury.

This is not the case with the white schools. The funds for their support, consisting in part of levies made by the County Commissioners, have been for many years very irregularly collected, or very irregularly paid over. In consequence of this, and of the withholding of a portion of the State levy, the County School Board, at an early period after the establishment of our system of public schools, became heavily embarrassed by the failure to receive sufficient funds for the payment of the teachers' salaries, and the other expenses of the schools. In this painful dilemma the County School Board endeavoring to relieve itself on the easiest terms of a present difficulty, instead of promptly taking measures to compel payment of the various

levies appropriated by law for the support of the public schools, resorted to the expedient of borrowing money and in various ways anticipating the revenues thereafter to be received by orders on the collectors or certificates of debt, which paper, passing from hand to hand, has been continually shared by various parties, all striving to pay the taxes with paper purchased at a large discount, and delaying payment of the taxes in the expectation of an opportunity to profit by the purchase of this depreciated paper. By such expedients the School Board obtained present relief for themselves, but left a heavy debt to be paid by those who should come after them. This debt is now to be paid. Having no other means to discharge this debt, we are compelled to contract expenses by reducing the salaries of our teachers, and limiting the session of our schools to a shorter period than the four terms prescribed by law, until this debt is paid; unless relief can be obtained by the assistance of the next Legislature or of the County Commissioners.

It may be proper here to repeat that the payments of salary shown to have been made to our teachers are only in a small part on account of the year just ended. Beginning every year with a heavy debt the payment of the salaries for each year is continually delayed until the prior obligations are discharged. The payments are principally for the year preceding. The amount of the County School Tax stated in the aggregate of \$15,772.73 paid, consists of \$9,372.31 paid of the levy of 1878, on which \$9,305.17 is still due, and \$6,400.42 paid of balances due on prior levies, commencing with 1873 and running down to the present time.

The amount of the levy of 1879 is given, on which nothing is yet paid.

There is now due to our teachers, on account of salaries for the year ending 30th September, 1879, the sum of twenty thousand six hundred and fifty dollars and ninety cents, (\$20,650.90,) and due for incidental expenses five hundred and seventy-five dollars and sixty-eight cents, (\$575.68.)

WILLIAM HARWOOD,
Secretary, &c.

BALTIMORE COUNTY.

WILLIAM M. ISAAC, *President.*

THOMAS C. BRUFF, *Secretary, &c.*

PROF. M. A. NEWELL: In submitting the annual report for the year 1879 there is little of interest to add to the complete details found in the different tables it contains.

Last May the County Commissioners reduced the school levy from fourteen to thirteen cents on the hundred dollars. This reduction, with the great number of new buildings demanded, would have interfered with the operation of the schools had they not conceded a principle for which we have always contended, that the schools are entitled to the full amount levied for them without being subject to abatements from erroneous assessments and interest upon unpaid taxes. Since May last all money due the schools has been paid in this way, and by this simple act of justice the Board of School Commissioners has been able to build a number of substantial houses in localities where they were much needed.

It is not a general custom to explain large balances, but as it has been charged that the schools are receiving more money than they actually need, on account of the balances shown by the annual report at the close of each year, the following explanation is given:

The county levy is made on the first day of May, and under our system the Treasurer collects the taxes. He is authorized to allow a discount of six, five, four, three and two per cent. for the months of May, June, July, August and September, respectively. In order to obtain the

benefit of these liberal discounts, the bulk of the taxes is paid into the treasury between the first of May and the thirtieth of September, the close of our fiscal year. Of the \$82,882.01 received from the county this year, \$48,750, more than one-half, was paid during this time. There was also received from the State the June distribution of the State School Tax, the Free School Fund and the Academic Fund, aggregating \$14,373.25. The scholastic year closes June thirtieth, when the salaries of teachers are paid for the summer term, and the heaviest cost of the system ends. During the two months of vacation (July and August) the expenses are comparatively light, embracing the salaries of the officers, building, repairing and furniture. This accounts for the large amount on hand at the close of the year, without which the schools could not be successfully conducted through the fall, winter and spring terms, as the amount of money received during those terms is not adequate for the purpose; hence, the necessity for a large balance at the close of the fiscal year.

It will be seen by the detailed statement, contracts have been consummated for thirteen new houses, seven of which have been completed. The other six are in process of erection, and will be ready for occupation by the first of January next. School 1, district 2, at Humane, is a brick house, 24 by 36 feet, and replaces a dilapidated weatherboarded house. It will accommodate about seventy pupils. School 3, district 2, at the Granite Quarries, is of stone, 24 by 36 feet, and replaces an old frame house for which there was no title. School 9, district 2, is near Harrisonville. For a number of years school was held in a damp basement rented for the purpose. The house, though expensive, is one of the most complete one-room school buildings in the State, and will stand as a monument to the untiring energy of its originator. School 10, district 2, 24 by 36 feet, built of stone, is on the Liberty road, near the Carroll county line. It replaces an old frame building, originally intended for a corn crib, which was rented four years ago for school purposes. The addi-

tion at Pikesville, school 2, district 3, is of brick, and contains two rooms. The people of this community had repeatedly asked for more comfortable and extended accommodations for their children, a reasonable request, which the board could not grant, until recently, on account of the want of funds. The old house was thoroughly repaired, and, with the two rooms in the addition, will seat one hundred and fifty pupils. School 9, district 5, is of stone, 25 by 36 feet, at Resh's. When this school was established an unoccupied dwelling house was rented, which, with its contracted and ill-ventilated rooms, was found unsuitable for the purpose. School 6, district 6, is of brick, 24 by 36 feet, at Ruhl's. It replaces a dilapidated log house in which some of the pioneers of the present system served an apprenticeship more than forty years ago. School 9, district 8, is of stone, 24 by 36 feet, at Shaneybrook's, on the York turnpike. For ten years a school has been kept in this neighborhood, in a narrow frame shanty, built by the Northern Central Railroad Co. for a tool house. A new building has frequently been petitioned by the patrons. School 10, district 8, at Warren, is built of stone, contains two class rooms with seats for one hundred pupils. This school has been conducted in a damp basement with decayed floor, flat upon the ground, and narrow windows, barely admitting sufficient light. The primary grades were in a rented room up stairs, where they were in constant danger of falling through upon the heads of those below. It was a hard necessity that compelled parents to risk the health and lives of their children in such a place as this, and they are highly gratified in having more comfortable surroundings. School 8, district 11, on the Bel Air road, is of brick and replaces an old house which was sold at public sale for \$18.90. It is in the centre of a growing settlement and will accommodate about eighty-five pupils. School 1, district 12, at Canton, is a two-story brick building with eight class rooms and four hat and cloak rooms; four class rooms and two cloak rooms are in the second story. The house is in the centre of a rec-

tangular lot, which is so divided that each sex has its own entrance on opposite sides of the building. Heretofore two hundred and twenty-five pupils have been crowded into a house built for half the number, in which there was no ventilation, except through windows and doors, and the air breathed by so many was not only unhealthy, but offensive. School 14, district 12, is at Highlandtown, and is built of brick, with two rooms. The lot and old house were purchased by the board in 1877. One room was not sufficient for the increasing population of this thriving village, and more extensive accommodations were demanded. During one term the school increased from seventy to one hundred and twenty-five pupils. School 4, district 13, at Mount Winans, is of brick, 24 by 36 feet. It replaces the school formerly held at Sextonville, in a house which did not belong to the county, kindly granted free of rent by Mr. Sexton. Other buildings are petitioned for, and in many cases they are much needed to replace the frame shells erected when the system was in its infancy. These houses cannot all be built in any one year, as it is the policy of the board to shun debt. The necessary running expenses of the schools is the first consideration, and any surplus over and above this will be applied to building purposes. It is economy to have substantial houses, and they will be built where they are most needed, as the money is furnished by those who control the purse strings.

The public schools continue to become more popular as they increase in efficiency. This report shows an increase of five hundred and seven pupils over the number entered in 1878. Many who heretofore patronized private schools are now sending their children to our public schools. The substantial and practical is sought in place of the ornamental, and the thorough English course now guaranteed is the recommendation of the public school. When it is completed, pupils are prepared either for the Freshman class at college, or the ordinary avocations of life. A large majority of our teachers are experienced and competent educators, and are doing good work. Those

who fall below this standard are fast disappearing, and trustees are demanding something more than a permit to keep school. Two normal classes, one for white and the other for colored teachers, have been organized, the expense of which is borne by those desiring instruction. The Saturday class for white teachers is held at Reisterstown, and is conducted by E. E. Ijams, Principal of the Reisterstown High School. A number of teachers have availed themselves of the advantages of his instruction. The class for colored teachers is conducted by Jos. S. Whittington, Principal of the Waverly High School. It is held at the Howard Normal School, Baltimore, during the month of July. His thorough system of teaching has infused new life into these people, which is perceptible in the management of their schools.

Gradation is now an accomplished fact, and it is the general opinion of the teachers that this system, properly conducted, with annual questions for promotion, prepared by the Examiner, must result in the efficiency of the system. The same questions were sent to all the schools. The examination began on Monday, the sixteenth of June, subject to uniform rules and regulations, and a time table for the different grades and studies. The detailed statement here given shows the result of the year's work, though it is not as complete as it should be, owing to the fact that several teachers neglected to send in reports.

Number examined in	Number promoted
First Grade.....1099	First Grade 421
Second Grade..... 995	Second Grade.... .608
Third Grade..... 986	Third Grade.....645
Fourth Grade.....1012	Fourth Grade.....443
Fifth Grade..... 569	Fifth Grade.....207
Sixth Grade..... . 266	Sixth Grade..... 97
Seventh Grade.... 54	Seventh Grade..... 38

Thirty-eight pupils (twenty-five boys and thirteen girls) completed the public school course, making the required average in the seventh grade, and received certificates of scholarship.

The Legislature meets again in January, and we trust no changes will be made in the School Law which may result to the detriment of the schools. Experience has made school officials familiar with the present system; it is bearing abundant fruit; the people are satisfied, and where there is no general complaint it would be wise to let well enough alone.

THOS. C. BRUFF, *Examiner.*

CAROLINE COUNTY.

Prof. M. A. Newell,

DEAR SIR: I will only occupy by remarks a small space in your annual report. I can say our schools are doing well. There is marked improvement in teaching power, and the pupils afford evidence that they are gainers thereby. A large majority of the teachers now in our schools, and many of them most efficient workers, have been taught and fitted in the matter of scholarship in the public schools of the county.

The County Commissioners have made us a larger levy than that of last year, giving us \$6,450; with this sum, though still insufficient, the Board hopes to keep the schools open three terms.

Owing to sickness of the Examiner last fall and winter, but few visits were paid the schools. This is a great injury done to the schools, and none regret it more than the Examiner himself. His health has much improved, and he hopes to visit the school regularly.

Respectfully submitted,

GEORGE F. BEAVEN.

CARROLL COUNTY.

WILLIAM REESE, *President.*JOSEPH M. NEWSON, *Secretary, &c.*

PROF. M. A. NEWELL: The Annual Report of the Public Schools for Carroll County for the year ending September 30th, 1879, is herewith respectfully submitted.

The conclusions, suggestions, and opinions of our School Board on the public school system, as administered in Carroll County and in the State generally, instead of having undergone any important changes, have been strengthened and confirmed; and for these, we respectfully refer you to our previous annual reports.

If, instead of trying to make radical alterations in the school law, our legislators will content themselves with making only such slight amendments as will render each department more efficient, they will leave the schools of the State in the best possible condition for future progress in improvement. Under present provisions, crowned with our admirably conducted State Normal School, of which all enlightened and unprejudiced Maryland educators are justly so proud, and which is annually sending out so many thoroughly trained and accomplished professional teachers, we are rapidly moving on to the highest degree of success; and, if the present law, instead of being changed in any of its salutary provisions, shall be continued with no amendments whatever, or with only such as experience has shown will facilitate its better execution in a few of its details, such as the supply of the best text-books uniformly, the retention of the services of only efficient men and women, elevating and preserving them as PROFESSIONAL teachers, Maryland will soon stand in the very front rank in the superiority of her schools and in the intelligence of her sons and daughters.

Our "summary of school statistics" gives the number of school-houses in use, a few of which are "rented;" and, as the *graded schools* are provided with separate rooms for each grade, mostly in the same house, the number given for the houses does not exactly correspond with that given for the schools.

Teachers sometimes change or withdraw from service, so that our table does not show the exact number of persons that have been employed as teachers during the year; nor does it exactly show the number of professional public school teachers in the county. Several of our ablest teachers have failed to secure engagements, because, in some instances, the school trustees, in the exercise of their legal prerogatives, have dismissed their teachers at the last moment and employed other persons, who stand ever ready to take advantage of occasions of this kind.

Assistant teachers, generally employed only for short periods, are not numerous, nor are their names and sexes always reported, settlements for their services being sometimes made for both with the principal teachers.

The above items, together with the number of "fenced lots, out-buildings," &c., are only a near approximation to exactness, because lots may be reported "fenced" and to have "out-buildings," &c., at one part of the year and be found to be without them at another, to be rebuilt or destroyed, perhaps the following year.

The blanks sent to us for the annual report contain no columns for the separate insertion of the male and the female pupils in each separate school. We have, therefore, omitted them in the "summary of school statistics," and in their place, to make up the item of "different pupils for the year," we have inserted the *white* and the *colored* pupils separately.

Many teachers, using blanks of older dates, have so imperfectly reported their "pupils over sixteen years of age" that we have not inserted them in this report, leaving the space for that purpose blank.

That part of the tabular statement presenting the "school-houses built or enlarged" may not be exactly correct in every particular. We show the exact sums paid for each house indicated; but, as part-payments were made for some of them last year and full payments for others not yet quite finished, will be

made hereafter, the statement does not show the exact whole cost of each house ; but it shows only what money has been paid *this year* for each ; and so with the furniture, there being much more of the latter in the schools than has been purchased this year.

In that part of the table showing the receipts into the treasury, you may notice that the balance in bank and the sum remaining in the hands of the secretary at the close of last year, are thrown together, making the sum of \$5,471.69, as presented in the statement ; and that the sums of State School Tax and State Free School Fund together, make the sum of \$16,583.26, which, with the State appropriation to *colored schools*, \$1,166.48, is all that we have received from the State Treasury for the year ending September 30th, 1879.

In the column of disbursements you will see that the sums paid for salaries to white and to colored teachers are presented separately. Each of the sums paid for rent, repairing, incidental expenses, furniture, &c., consists of several items thrown together, a part having been paid with the salaries of the teachers, as is shown in the table of school statistics, and a part presented and paid in this office, on bills not connected with the teachers' reports. The sums paid for per diem, for assistant secretary's salary and counsel fee, and for colored schools, are, in like manner, made up of several items.

Having on hand a sufficient sum for the purpose near the close of the year, it was resolved that \$2,688.40, a balance of old indebtedness contracted by a former Board, should be paid off, which was accordingly paid, leaving the Carroll County School Board entirely out of debt.

A former Treasurer of the School Board, previous to the enactment of the present law, claimed as assets the sum of \$7,150 as stock in the Farmers' Bank of Maryland ; but as appears in the Comptroller's report, this sum is also claimed by the State Treasurer as stock held, not in the Farmers' Bank of Maryland, but in the Central Bank of Frederick. If that bank stock then stood to the credit of the Carroll County School Board in either of the banks named, it must still stand there, of which, however, we have in this office no other evidence than the late Treasurer's entry in a book presenting his assets when turned over to his successor, and an item in the Comptroller's report, wherein this

\$7,150 is claimed as stock held for the use of the State School Fund. If, then, it be held for the use of the State School Fund, it can scarcely at the same time be considered an item of the *County* School Fund available to the County School Commissioners. If, during our service we have ever received any benefit from this stock in dividends or otherwise, it must have imperceptibly come to us through the distributions from the State Treasury, of which we have never been informed.

In addition to this bank stock of \$7,150, there still exists due to this Board, uncollected, the sum of about \$3,873.62, as is shown in the table at the foot of the page showing the annual receipts, embraced in the items of ground rents, R. R. scrip, and balances due on judgments held against various parties, to which, if this bank stock be added, the old County School Fund will be represented by the sum of \$11,023.62.

In the columns headed "value of school property" and "cost of books" we have made no entries opposite each school in the tabular abstract of the teachers' reports, because our knowledge of the former cannot be relied on to enable us to speak with confidence, no correct authoritative estimates having been made of the value of the older houses; nor have we given the "cost of books" in connection with each particular school, because, as some of the pupils in certain districts buy their own supplies, and, as many of the county books, &c., previously in the schools are still in use, we have no certain means of knowing their cost originally, nor their present value in each school. We have, therefore, contented ourselves by giving in the column of disbursements the whole cost of the text-books, stationery, &c., provided for the schools during the year; and from the receipts for the use of books as collected from the teachers' reports, we have transferred the sum thus received to our column of receipts in general. Comparing these sums, the one on the Dr. and the other on the Cr. side of the account, and subtracting, we find that our receipts from books exceed their cost by the sum of \$448.84, which, we think, in a county of over a hundred schools is very close economy.

WILLIAM REESE, *President.*

J. M. NEWSON, *Secretary, &c.*

CARROLL COUNTY.—SUMMARY OF SCHOOL STATISTICS

For the Year ending June 30, 1879.

	\$53,781 46

SUMS OF THE OLD SCHOOL FUND DUE TO THE SCHOOL BOARD.

Taneytown Ground-Rents, with Interest.....	\$ 758 69
W. M. R. R. Scrip at 8 per cent. Interest.....	1,359 00
Balances due on Judgments, about.....	1,755 93
* Bank Stock held by State Treasurer.....	7,150 00
	\$11,023 62

* The above item of \$7,150, mentioned as "Bank Stock," is claimed by the State Treasurer, who holds it as belonging to Carroll county, as appears by the Comptroller's report of 1875, (and doubtless of all his annual reports); and instead of being in the "Farmers' Bank of Maryland," as stated in this office by the late Treasurer, it is shown to be in "The Central Bank of Frederick," as "stock held for the use of the State School Fund;" and being accounted for by the State Comptroller, it can scarcely at the same time be properly chargeable as part of the County School Fund available to the County School Commissioners.

CECIL COUNTY.

Prof. M. A. Newell, Secretary of State Board of Education.

DEAR SIR: In reporting to you the condition of the schools of Cecil County for the past year we have to say that we were not able to keep the schools open for the full time of ten months, but only eight and a half months. The character of the schools, however, has not declined in any particular. Our numbers are about the same, with a slight increase in the average attendance.

In regard to our impressions of the present school law and its practical working and efficiency we would refer you to our last report. We have, during the past year, seen nothing to change, but much to confirm the views therein expressed.

We have nothing more of any special interest to communicate which will not be found in the body of the report.

Very respectfully,
JOHN SQUIER, *Secretary.*

CECIL CO.—SUMMARY OF SCHOOL STATISTICS

For the year ending September 30, 1879.

	1879.	1878.

CHARLES COUNTY.

GEO. M. LLOYD, *Pres't.*A. W. NEALE, *Sec'y and Treas.**Prof. M. A. Newell,*

In forwarding to you the annual report of Charles County Public Schools for the last scholastic year, I shall not venture to make any remarks beyond giving one or two pieces of information not contained in my statistical summary.

On the 28th of January last, the old Board and Examiner having retired from office, your present subscriber was appointed to the responsible position vacated by Mr. George M. Lloyd, my most valued and honored predecessor. It is a subject of congratulation that the educational interests of our county do not entirely lose his valuable services; together with Mr. Samuel W. Adams and Samuel Cox, Jr., he constitutes our present Board of School Commissioners—being president of that body.

I am sure, my dear sir, that you so fully appreciate the past services and worth of Mr. Lloyd as to make the severance of your official relations a subject of very deep regret to you. He still enjoys good health in the quiet pursuit of his home affairs; but failing health, which rendered him incapable of taking the long rides over the country necessary in the discharge of the duties of his office, was the primary cause of his withdrawal.

You will notice in the report that the number of visits made by the Examiner does not come up to the requirement of the law. This was because of the ill health of Mr. Lloyd, which prevented him from making his usual rounds last fall.

I entered upon the discharge of the duties of my office in February last, and have reported the number of visits made by myself up to the 30th of September last. I have visited thirty-eight schools this fall, commencing my rounds in October.

During the year we had the misfortune to lose by fire, school No. 2, 1st election district. This house was situated in our county town—Port Tobacco—and was the largest and best school-house in the county. Our schools, I believe, are going on in a manner satisfactory to the Board and the patrons, and hoping we may be able to afford you the satisfaction which would be so agreeable to us to be able to render you, I remain with great respect

Very truly, your obedient servant,

A. W. NEALE,
Secretary and Treasurer.

FREDERICK COUNTY.

JAMES W. PEARRE, *President.*D. T. LAKIN, *Secretary.**Prof. M. A. Newell, Secretary of State Board of Education.*

DEAR SIR: The annual report of the Board of County School Commissioners of Frederick County for the year ended September 30, 1879, is herewith respectfully submitted.

By comparing our present financial statement with that of last year, it will be observed that the Board received from the State School Tax for 1879 \$3,462.18 less than was received from the same source for the year 1878, and from the County School Tax for 1879 \$6,249.94 less than was received during the previous year.

Without additional receipts for the present year, the Board will be absolutely without one dollar to build or repair school houses if the schools of the county be kept open for seven and a half months, as heretofore.

This is to be much regretted, as the attendance upon our schools is annually increasing, and demands are constantly being made upon us for additional and improved facilities in the way of school buildings, furniture, &c.

The only suggestion that we make is that the matter rests wholly with the people themselves. Additional or better facilities cannot be furnished unless more money be provided. If the people be unwilling to pay anything more for public education, they must be content with the inadequate facilities for the education and comfort of their children now afforded them, and should cease finding fault with School Boards for not doing for them what is impossible for them to do without money. It remains to be seen what "we, the people," will do about it.

The falling off in receipts from the State School Tax, we suppose, is attributable to the fact that for several years prior to

1878 there had been a special appropriation out of the general treasury of the State of \$100,000 annually for the support of the colored schools of the State, while the whole amount received into the treasury, on account of the levy of Public School Tax, was appropriated to the support of white schools.

The appropriation bills passed by the General Assembly at its session in 1878 (Act of 1878, ch. 406, and Act of 1878, ch. 331,) appropriates \$100,000 out of the receipts from Public School Tax for the support of colored schools, and appropriates the balance of receipts from that source to the support of the white schools, State Normal School for whites, and the State Board of Education.

By the operation of these bills the white schools of the State have received, and will receive for the incoming year (1880), more than \$100,000 annually less than they were entitled to receive under previous appropriation bills. This seems to us to be making progress backwards, especially when we reflect that the larger appropriations were carried through the whole period of our financial depression; that the industries of the State are reviving, and that the number of children to be educated must certainly increase in the natural order of things.

The large falling off of receipts from the county must be attributed to reasons supposed to be satisfactory to our Board of County Commissioners.

The indebtedness of the Board at the close of the year was \$5,000, less \$293.06 cash balance in treasury.

In reference to this we would remark, that until there shall be a law appropriating a specific amount of money for the support of the public schools, to be disbursed equally in quarterly instalments, no School Board can make any reliable estimate of the amount of money to be received during the year, nor of the appropriations it can safely make during the year.

In other words, no School Board can guard against the possibility of incurring an indebtedness which cannot be paid out of the receipts of that year, unless it can be known either certainly or approximately the amount of money the Board will receive during that year. By the Act of 1878, ch. 96, being an Act to define the duties of Comptroller of the Treasury relative to the apportionment and distribution of the revenues derived from the annual tax levied for the support of free public schools, &c., it is

provided that "It shall be the duty of the Comptroller to equalize, as far as may be possible, the sums to be apportioned, so as to apportion and distribute the same amount, as far as may be practicable, on each of said days."

Under the foregoing law any School Board would have the right to expect that the first instalment of School Tax from the State for the year (which is payable in October) would indicate, at least approximately, the amount to be received during the year—*e. g.*: If \$5,000 were received in October, then \$20,000, or about that amount, could be expected during the year. But such has not been the practical working of the law.'

The School Board of Frederick County received in the distribution of the School Tax in October, 1878, for white and colored schools, the sum of \$8,125.17. Upon this basis, with an equal distribution for the three remaining quarters—in January, March and June—this county would have received for the year ended September 30, 1879, of the State School Tax, the gross sum for white and colored schools of \$32,500.68. The gross amount actually received was \$27,788.67, or \$4,712.01 less than we supposed would be received upon the basis of the October distribution in 1878.

Had we received the \$32,500.68, instead of the \$27,788.67, which we did receive, we would have had a small balance in the treasury instead of being in debt \$4,706.94 at the close of the year. But we did not get the money, and we closed the year in debt to the amount above named.

Very respectfully,

D. T. LAKIN.

GARRETT COUNTY.

Prof. M. A. Newell,

DEAR SIR: In presenting our annual report of the Public Schools of Garrett County, there is but little to add to the statistical information. The average attendance must appear disproportioned to the enrolment, and a falling off from that of the previous year. In explanation of this, I would say that last winter was regarded as one of the severest known in this section for twenty years, it being at times impossible for the children to reach their schools.

The condition of the Public Schools in our County, and its educational interests generally, are in as satisfactory a condition as could be expected. The County is a large one, and sparsely settled. The poverty of the population, as a general thing, makes it impossible, with the means at our disposal, to bring our county up with the others in the State.

The error in cash balance reported September 30, 1878, arose from the fact of the Collector paying \$300 to Treasurer in advance, and which amount should have been credited to levy of 1878-'79.

E. H. BARTLETT,
Secretary.

GARRETT COUNTY—SUMMARY OF SCHOOL STATISTICS.

HARFORD COUNTY.

Prof. M. A. Newell,

DEAR SIR: I present herewith the annual report of the Public Schools of Harford County for the year ending September 30, 1879.

The Board closed eight schools during the past year, which, together with the fact that Scarlet Fever and Measles prevailed in some sections of the County has reduced the number enrolled somewhat. This decrease will, however, be more than made up during the coming year.

Three new houses, as noted in the last report, were finished about January 1st, 1879, being the first building done since the present Board came into office, January 1, 1876. We are greatly in need of several new houses now, but the County Commissioners declined to levy more than 12 cents for the schools, and so the houses could not be erected.

The money levied by the County is never paid promptly, and this causes much inconvenience and prevents the Board from running strictly upon a cash basis.

On September 30, 1879, there was in the hands of collectors, over-due and unpaid, the sum of \$7,774.49. The Board, upon the same date, owed upon certificates of indebtedness to teachers, \$3,079.78, upon notes for books, \$1,258.89, and for building and furniture, \$1,665.59, in all \$6,004.26; to the former must be added the cash balance \$257.46, and then it will be seen that the assets of the Board exceed its liabilities by \$2,027.69.

The Board started in 1876 with an indebtedness of over \$30,000.00, of which the County paid \$27,325.78. The balance of this indebtedness has been paid, and the schools run $3\frac{1}{2}$ terms during the past two years upon a County levy of 10 cents in 1876 and 12 cents in 1877 and 1878, (the extra $1\frac{1}{2}$ cents in 1878 being for building,) while upon a levy of 15 cents during previous years the schools were open only 3 terms, and then the Board was constantly getting more deeply into debt.

Our last institute, held September 1st to 5th, showed that our corps of teachers is composed of intelligent men and women, who realize the defects which are injuring our schools, and are doing their best to co-operate with the Board and the Examiner in making the schools as effective as possible.

Very respectfully,

W. H. HARLAN, *Secretary.*

HOWARD COUNTY.

DR. JAMES T. WILLIAMS, *President.* JOHN G. ROGERS, *Secretary, &c.*

Prof. M. A. Newell, Secretary of State Board of Education.

DEAR SIR: The annual report of the Public Schools of Howard County for the year ending September 30, 1879, is respectfully submitted.

For the year just ended I think that I can safely say that our schools have done well.

The continually increasing demand for additional school facilities has stimulated the patrons of various sections to numerous generous offerings and undertakings. They have erected, free of cost to the County, at present, a fine and commodious building near "Waterloo," in the sixth election district of this County. This school has been in successful operation since the Winter Term. This noble work on the part of the people in the locality just mentioned has been followed by an undertaking, almost as generous, in another section of the same district—in the last, however, the School Board did assist somewhat. We have erected, and have now ready for use, a new school near Clarksville, in the fifth election district. This has not been noticed in my account of disbursements, because of its not being finished at the end of our fiscal year, and because it will be paid for out of the funds for the ensuing year.

The average attendance in several schools has been such as to require an assistant. This, with the additional expense of the support of the "Waterloo" School, and the continual falling off the "State School Tax," brings us into a comparatively small indebtedness to our teachers. But the County Commissioners came to our aid, and have

levied for this year ten, instead of nine thousand dollars as heretofore.

In view of the increased expenses above mentioned, the Board have found it *absolutely necessary* to reduce the salaries of our teachers. This action was taken *most reluctantly*, and only after the most careful examination of all the means available to enable us to run our schools for the four terms, and demanded by the Board of County Commissioners, and made a condition precedent to the levying of the extra thousand spoken of.

Our colored schools are not what I would like them to be, either in attendance, zeal, or ability of teachers. For the last I can only account, and the reason is that our salary is so small that we cannot command what the school-room ought to have.

Our teachers seem to appreciate the usefulness of the association, which holds its meetings regularly at the end of each quarter, and is, I am sure, productive of great good.

The schools are all graded, and I am confident that a great deal of valuable time is thereby saved to the child, and labor to the teacher.

Respectfully,

JOHN G. ROGERS,

Examiner.

	\$21,751 71

KENT COUNTY.

Prof. M. A. Newell, Secretary State Board of Education.

In submitting our annual report we desire to say that the buildings in which the colored schools are held are not the property of the Board, and they have not been included in the valuation of school property.

In addition to the regular school work we have a Teachers' County Association which meets regularly every term, and which we find to be a valuable feature of the School Law.

A very successful Teachers' Institute was held for three days during the last week of June, which was attended by the Principal of the State Normal School.

R. W. JONES, *President.*

EBEN F. PERKINS, *Secretary.*

KENT COUNTY—SUMMARY OF SCHOOL STATISTICS

For the Year ending June 30, 1879.

	1879.	1878.

PRINCE GEORGE'S COUNTY.

DR. W. W. DUVALLE, *President.*

T. S. STONE, *Secretary, &c.*

Prof. M. A. Newell,

DEAR SIR: We herewith respectfully submit the annual report of the Public Schools of Prince George's County for the year 1879.

The accompanying tables, when accurately filled out, are so comprehensive, so perfect in form and arrangement, as to give at a glance all information that can reasonably be asked for by the public.

We are pleased, however, to avail ourselves of the privilege of the written report to invite public attention particularly to our financial exhibit made on margin of financial table.

From this financial statement it will be seen that the resources of the School Board exceed its liabilities by 2,327.21 dollars.

The amount, 9,020.74 dollars, entered as due Treasurer, is a debt that the County owes to its public schools, and which it is gradually paying into the school treasury.

To be able, at this time to show a net balance of over two thousand dollars to the credit of the School Board, is not only a pleasing exhibit to be made to the people of our County, but when taken in connection with the work accomplished by the School Commissioners during the past eight years is, we think, the strongest possible proof that the Public School Fund has been judiciously managed. For during that period our schools, with the exception of a single quarter, have been regularly kept opened ten months each year; our teachers have been paid an average salary of from 400 to 420 dollars, and two-thirds of the number of our old school-houses have been replaced by new and comfortable buildings, supplied with the very best school furniture. Still we need at least seven new buildings to accommodate the rapidly increasing number of children applying for admission to the schools, the old houses being past repair and already over-crowded.

But how these houses are to be built we cannot at present see, the aggregate received from State and County tax being barely sufficient to pay teachers salaries and current expenses of schools.

That our schools have grown in popular favor may be readily inferred from the yearly increase in the average attendance and from the significant fact that we are no longer harassed by complaints against public school teachers.

That our teachers have also increased in efficiency in the school room we do feel assured; every means has been employed by the School Board to keep them up to the required standard of proficiency in the various branches taught and to instruct them in the method of teaching, and we do believe that many of our schools do now accomplish more in a single day than was formerly done by the same schools in six months.

In our last report to the State we showed twenty-one colored schools in operation, nineteen of these as held in houses owned by the County; since that report was made, we have built three additional houses, and now have twenty-two schools at work under trained colored teachers.

These schools have received especial attention from the Examiner, and are claimed by him to be equal to any of their grade in the State.

In reporting value of school property we approximate as nearly as possible its present cash value. Some of the school houses were built when material was more costly and charges of workmen higher than at present, and of course cost more than they are now valued for.

In conclusion, allow us to express the hope that our next Legislature may leave intact our School Law, thereby affording to the school men of the State an opportunity of further promoting the interest of the public schools, under the excellent system which the State in its wisdom has already provided.

DR. W. W. DUVALL, *President.*

T. S. STONE, *Secretary.*

QUEEN ANNE COUNTY.

Prof. M. A. Newell:

DEAR SIR: I send you my annual report. It contains all the information you need. Our School Board did not ask for as large an amount of money this year as formerly, as they had determined to reduce salaries fifteen per cent., and would not need as much. Heretofore when my report was made we had a considerable balance in the hands of Collectors, besides a balance in my hands as Treasurer. There is still a small balance in my hands, but smaller than usual, and the Collectors have paid up in full. This has never been the case before since the present system was adopted. Next year we will have nothing but the resources of the year to rely upon, and no balances, but we have sufficient means secured to keep the schools open for ten months at the decreased rate of salary, as, while nobody owes us (except a small amount from a neighboring County, on account of a joint school), we owe nobody a cent, and, therefore, we commence the year with a square balance sheet. I will send you a copy of my report as soon as the newspapers containing it shall be published.

Very truly yours, &c.,

JAMES W. THOMPSON,

Examiner, &c.

QUEEN ANNE COUNTY—SUMMARY OF SCHOOL STATISTICS

ST. MARY'S COUNTY.

Prof. M. A. Newell, Secretary State Board of Education.

SIR: I have the honor herewith to transmit my annual report for the year ending September 30, 1879.

The cash balance is not so large as has heretofore been the case. This is not to be wondered at, since by reference, it will be found that the payments from the State on account of Public School Tax fall nearly \$1,200 short of what they were for the previous financial year. This, taken in connection with the fact that the payments on account of the Free School Fund are also in arrears in about the same amount, cannot but impress one uncomfortably.

A certain amount is levied by the representatives of the people for public school purposes, a certain other sum is pledged on the faith of the State to be paid in return for funds used which were the gift of the General Government, and yet the amounts due are not paid over. Surely there can and should be some means devised to compel the payments that are so very necessary. The failure on the part of the State to make the full payments has caused trouble in some sections, even necessitating the temporary suspension of the schools.

Our schools have fortunately not been closed in St. Mary's, and we have gone on with the necessary building and repairs; but another such short payment on the part of the State must seriously cripple us. Twice in the course of three years to lose so large a sum is too serious a thing to be lightly regarded, in view of the already miserably small compensation paid to our teaching, and the worse than indifferent character of the school houses and furniture as at present provided. The Treasurer should be placed in a position to *know* what the State will pay over to him within reasonable limits, otherwise he is weakened when he should be most strong, and wounded in his most vulnerable point.

I trust that in our Legislature, that will assemble next winter, there may be found some to take the public school question under most careful consideration; to lop off, if need be, any excrescences that may be found to deform our present system, but with jealous care to guard its chief features and protect it from envious assault.

I may not be qualified to speak advisedly regarding the operation of the system elsewhere, but with us I know it is doing an amount of good that only the future can fully make known. With us, as elsewhere, it has come to be a recognized fact that the public schools are no part of a pauper system. That the education to be given by the State is not to be limited to the miserable modicum of intellectual food with which the children of the very poor must be content, if no better be offered, or with which the needy offspring of the most ignorant and debased may be satisfied. The imperative demand of the near future will be for the very best schools that can be had, and the co-operative efforts of all good citizens to that end must bring about the desired result; but this co-operation to be effective must call to its aid active, thorough, searching supervision. The supervision must be of a kind to ensure on the one hand an honest and wise disbursement of the school funds, and on the other the employment of none but properly qualified teachers, regardless of local or other prejudices; and such teachers when obtained must be retained by being paid, for good work well done, a fitting compensation.

Respectfully,

GEO. THOMAS.

SOMERSET COUNTY.

BERRY T. B. JONES, *President.*W. E. JONES, *Secretary.*

Prof. M. A. Newell, Secretary of State Board of Education.

DEAR SIR: I have the pleasure herewith to respectfully submit the annual report of the Public Schools of Somerset County for the year ending September 30, 1879. Outside of what is contained in the statistics there is but little to communicate. I regret very much that a glance at our receipts and disbursements will disclose an absence of "Balance on Hand." We have striven to keep our disbursements within our receipts, but owing to the fluctuating nature of our receipts, particularly the oyster revenue, we have been unable to do so, but our indebtedness is too small to affect the success of our schools.

Our schools to-day have more pupils and a larger average attendance than they have ever had, which is attributable, in a great measure, to a higher appreciation of the system. In some few districts, not noted for their culture, the attendance is lamentably small, and any remedy for the evil, outside of a compulsory law, is difficult to find.

The pupils are very well supplied with books from the office and the many stores in different sections of the County. Children whose parents are not able to buy them are furnished free on application of the District Trustees.

The apparent discrepancy existing between the "County School Tax" and "Amount of Levy" is explained from the fact that the excess of the Levy was a part of a balance due last year, but not paid until this.

My report has been ready since the 4th instant, but owing to an attack of rheumatism, and a failure to get a meeting of the School Board, I have been unable to send it until now.

Hoping it may be found acceptable,

I am, very truly yours,

W. E. JONES.

TALBOT COUNTY.

WM. M. HOLLYDAY, *President.*ALEX. CHAPLAIN, *Secretary, &c.**Prof. M. A. Newell,*

DEAR SIR: In compliance with the requirements of law, I have the honor to submit, herewith, the annual report of the Board of County School Commissioners of Talbot County for the scholastic year ending July 15, 1879, and the fiscal year ending September 30, 1879.

In some districts of the County, whooping cough interfered quite seriously with the enrollment and attendance of pupils in the schools; yet, we are glad to report that both the enrollment and attendance were about the same as for the preceding year.

During the year, two new school houses for white children were built, and a third was enlarged and improved in such a manner as to make it as comfortable and convenient as a new house. All of these houses were furnished with patent desks. Only one new school house was built for colored children; but it is a neat and substantial building, and we shall use endeavors to provide houses for colored schools as rapidly as the money for that purpose will permit. Many of the school houses in the County are old, contracted as to size, and provided with furniture of poor style and quality. Providing new houses and furniture for our schools is a matter which constantly engages the attention of the School Board; but, in consequence of the great outlay which building and furnishing houses involves, it moves along slowly. It is gratifying, however, to know that something is accomplished in this direction every year.

Many of our colored teachers are still poorly prepared, so far as scholarship is concerned, for their work. The best material that has offered, however, has been employed, and these teachers have done very fair service.

The financial condition of the Board is quite satisfactory. At the close of the fiscal year the Board had no indebtedness, and there was still due to us, from the County levy of 1878, two thousand seven hundred and fifty dollars.

Very respectfully, your obedient servant,

ALEXANDER CHAPLAIN,

Secretary, &c.

WASHINGTON COUNTY.

WILLIAM RAGAN, *President.*P. A. WITMER, *Secretary.*

Prof. M. A. Newell, Secretary State Board of Education.

We submit herewith the annual report of the Public Schools of Washington County. The expenditures were somewhat in excess of the previous year, principally on account of teachers' salaries. The receipts were less from the State Tax by \$2,520, which resulted in an increase of the indebtedness of the Board of over \$3,000.

The enrollment and average attendance have been larger, and a few additional teachers were employed. Eight new houses are reported, and we are gratified to be able to state that Washington County is now well supplied with comfortable, substantial school houses, well furnished and equipped.

The large expenditures for school houses, which have always heretofore swelled the aggregate of our expenses, will not be required in the future, and we anticipate a considerable reduction on this account.

We report the Schools generally in good condition, and although the Board has reduced salaries to the extent of 10 per cent., we have been able to retain all our best teachers.

Respectfully submitted,

WILLIAM RAGAN,

President.

WORCESTER COUNTY.

Prof. M. A. Newell,

DEAR SIR: My annual report for the year ending September 30th, 1879, is herewith submitted.

In my last annual report I felt authorized to state that the Public Schools of this County, during the year ending September 30th, 1878, had made decided progress; that, in fact, during that year our Public Schools attained a higher degree of excellence than ever before. While I cannot say that our Schools, during the year just ended, have been better than they were the year before, yet I can assure you they have been equally as good. If no decided advancement, yet there has been no step backward. We have fully maintained the standard of excellence attained during the preceding year. This we have accomplished without being compelled to go in debt, as many of our sister counties have been unfortunate enough to do. On the other hand, the Treasurer's accounts will show a handsome cash balance in the Treasury. In short, I think I can say that during the past year our schools have been well taught, our teachers promptly paid, and our houses kept in good repair.

Very respectfully,

GEORGE M. UPSHUR.

Secretary.
